

B1  
concl

at least one holding strip, said holding strip cooperating with said card body to define a gap between the holding strip and the card body at times when the holding strip is located adjacent to the card body; and

at least one film hinge, each film hinge corresponding to a respective one of each of said holding strips and pivotally connecting the corresponding holding strip to the one side of said card body, each of said holding strips cooperating with said card body at times when said holding strip is pivoted adjacent to said card body to define a gap between the holding strip and the fastening surface of the card body, said hanger supporting the bag in the gap between the holding strip and the fastening surface of the card body.

---

#### REMARKS

In the last Official Action, Claims 1-8, 15, 17-24 and 31 were rejected under 35 U.S.C. §102(b) as being anticipated by U.S. Patent 3,707,271 to Sanchez ("Sanchez (C)"). In addition, Claims 9-14, 16, 25-30 and 32 were rejected under 35 U.S.C. §103 as being unpatentable over various combinations of Sanchez (C) with either U.S. Patent 4,983,047 to Netto ("Netto (A)") or French Patent 2,579,174 to Ausnit ("Ausnit (N)").

In response to the last Official Action, the application has been amended to better point out and more distinctly claim the subject invention. The presently disclosed invention is directed to a hanger for use with plastic bags that are suitable for containing various merchandise for retail display. The hanger includes a card body (2) that defines a recessed fastening surface (7) thereon. A holding strip (11)
